

Assignment__4__1821__twu38

Tianqi Wu

12/6/2018

The first model uses method ‘UBCF’ with parameters: normalize = ‘Z-score’, method = ‘Cosine’, nn = 5. The RMSE is:

```
RMSE(test$rating,ratings[-train.id,][test.id,$rating)
```

```
## [1] 1.036137
```

The second model uses method ‘IBCF’ with default parametes. The RMSE is:

```
RMSE(test2$rating,ratings[-train.id,][test.id,$rating)
```

```
## [1] 1.563345
```

Overall, the script may take around half an hour to run. The computer system is Macbook Pro 3.1GHz, 8GB memory.
